

Backflow Assembly Tester List

This list is provided by Silver Lake Water & Sewer District as a convenience to our customers, and is not a recommendation to hire specific BATs. These testers have requested their company names appear on our list and have met certain criterion required by the District. This list does not include all certified BATs. If you wish to hire a company whose name does not appear here, you must ensure that they hold a current Washington State Backflow Assembly Tester Validation Card and have current calibration for their test instrument (within the last 12 months.)

For a complete list of testers please visit www.wacertservices.org.

Silver Lake Water & Sewer District makes no representation regarding the abilities or quality of service of the testers listed. Silver Lake Water & Sewer District assumes no responsibility for the actions or performance of these testers.
